

CE Compliance Information

Product Compliance Documentation

Document No.	SMK-CE-2026-001	Version	1.0
Issuer	SMK Transmission	Issue Date	11 September 2026
Product Scope	Applicable SMK Transmission products/models	Status	Company Statement

1. Purpose

This document provides general CE compliance information for applicable products supplied under the SMK Transmission brand. It is intended to support customer compliance review and document requests.

2. Product Coverage

Coverage is limited to the specific products and models for which applicable technical documentation, declarations, test information, or supplier documentation is available. Product applicability must be confirmed for each order.

3. Compliance Basis

Where CE marking is applicable, conformity is evaluated against the relevant European Union legislation and harmonised standards applicable to the specific product configuration. The exact directives, regulations and standards must be identified in the product-specific technical file or Declaration of Conformity.

4. Documentation

Product-specific compliance documents may be provided upon request where available. Customers should provide the model, voltage, power, configuration and destination market so that the applicable documentation can be confirmed.

Important Notice

This file is an informational company document and is not, by itself, an EU Declaration of Conformity or a certificate issued by a notified body. Do not use it as evidence that every SMK Transmission product is CE certified. A product-specific Declaration of Conformity should only be signed when the required conformity assessment and supporting technical documentation are available.
