

REACH Compliance Statement

Product Compliance Documentation

Document No.	SMK-REACH-2026-001	Version	1.0
Issuer	SMK Transmission	Issue Date	11 September 2026
Product Scope	Applicable SMK Transmission products/models	Status	Company Statement

1. Statement

SMK Transmission provides REACH compliance information for applicable products based on information available from the supply chain and relevant product/material documentation.

2. Scope

The applicability of REACH obligations depends on the specific product, materials, components and substances involved. This statement therefore applies only to models and configurations specifically confirmed by SMK Transmission.

3. SVHC Information

Where required, information concerning Substances of Very High Concern (SVHC) should be reviewed against the current Candidate List and supported by up-to-date supplier or material documentation. Because the Candidate List is updated periodically, compliance status should be reconfirmed when documentation is requested.

4. Documentation Requests

Customers requiring REACH information for a specific shipment or project should provide the exact product model and destination market. SMK Transmission will review the available supply-chain documentation and provide the appropriate statement where supported.

Important Notice

This document is a general company compliance statement and is not a certificate issued by an EU authority or independent laboratory. REACH/SVHC status can change as regulatory lists are updated; product-specific supporting information should be checked before issuing a definitive declaration.
